# COLD STORAGE *Report*

VOL. XLVII No. 3. Released March 15, 1962 at 2:00 P.M. (E.S.T.) MARCH 1962

## CONTENTS

	Page
Analysis of February 28, storage holdings and occupancy.....	1
Net change in storage holdings during February.....	3
Apple holdings, by States.....	3
Fresh fruits, vegetables, and nuts in storage.....	4
Frozen fruits and vegetables in storage.....	5
Dairy and poultry products in storage.....	6
Dairy and poultry products in storage, by States.....	7
Meats and meat products in storage.....	8
 Fishery products in storage.....	 9
Cold storage holdings, by geographic regions.....	10
Commodities stored in public general cold storage warehouses.....	12
Certain commodities in storage owned by the Government.....	12
Space and occupancy in public general warehouses in selected cities.....	13
Space and occupancy in public general refrigerated warehouses.....	14
United States refrigerated net piling space.....	15

[Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All February 28, data are preliminary.]

Total boysenberries	13,042	9,042
Total cherries	83,756	87,756

## COLD STORAGE REPORT, MARCH 1, 1962

### Commodity summary

Turkeys, frozen fruits, frozen vegetables, and juices in refrigerated warehouses on March 1 were a record for the date according to the Crop Reporting Board. Approximately 219 million pounds of turkeys were on hand compared with 152 million on March 1, 1961. The 1957-61 average for the date is 144 million pounds. Total frozen poultry holdings in storage were 345 million pounds, about 29 percent larger than a year earlier and 26 percent larger than average. Frozen fruit holdings declined 49 million pounds during February but stocks of 439 million pounds on March 1 were 8 percent larger than on the corresponding date last year and 12 percent above average for this time of year. Among the frozen vegetables, March 1 stocks of asparagus, lima beans, snap beans, corn, mixed vegetables, peas and carrots mixed, french fries and spinach were at new highs for the date. These and the other frozen vegetable items made up the March 1 supply of slightly more than 1 billion pounds. A year earlier, stocks totaled 862 million pounds while average stocks for March 1 are 728 million pounds. A February net gain of 12 million gallons raised March 1 warehouse holdings of orange concentrate to almost 42 million gallons. This time last year, 36 million gallons were in storage while the average for the date is 33 million gallons. Warehouse stocks of butter gained sharply during February and at 259 million pounds were about 3 times the holdings of a year earlier and 4 times the average for March 1. About 87 percent of the March 1 butter stocks were Government-owned.

American cheese holdings declined more than usual for this time of year. The 20 million pound drop compares with the average decline of 15 million pounds and stands in sharp contrast to a gain of 6 million during February 1961. Stocks, at 385 million pounds, were about one-third larger than both last year and average. Stocks of shell eggs gained slightly over the previous month and on March 1 totaled 38,000 cases, up 9,000. Frozen eggs declined 9 million pounds to 41 million pounds. This compares with 49 million stored a year earlier and 60 million pounds, the average for March 1. Red meat stocks increased slightly during February. A 16 million pound gain brought March 1 holdings to 498 million pounds, 6 percent more than on March 1, 1961, but 9 percent under average. During February 1961, stocks gained 24 million pounds while the average February gain is 28 million pounds.

### Cooler and freezer stock changes

February gains in cooler stocks of fresh vegetables, nuts, eggs, pork, and canned meats were more than matched by seasonal reductions in other cooler-held products. Net withdrawals of cheese, milk, beef, and fresh, dried and evaporated fruits, lowered March 1 total cooler weight to 2.2 billion pounds--a drop of about 400 million from the previous month. For this time of year, these were record stocks and exceeded the previous high in 1959 by 79 million pounds. Except for gains in stocks of butter, juices and pork, holdings of freezer-held items were lowered during February. The March 1 freezer-stored weight, while down to 3.4 billion pounds, was the largest for the date and compares with 2.9 billion stored a year earlier and 2.7 billion, the 5-year March 1 average.

### Storage occupancy in public warehouses

Occupancy of cooler and freezer space in public warehouses declined seasonally during February. March 1 cooler occupancy declined 1 percentage point to 53 percent. This compares with 51 percent for both March 1, 1961, and the 5-year average. Reductions in occupancy during February in New England, Middle Atlantic, West North Central, and Mountain Regions were partially offset by gains in other regions. Freezer occupancy on March 1, at 71 percent, was a 4-point reduction since February 1. On March 1, 1961 freezer occupancy for the country as a whole was 66 percent compared with the March 1, 1957-61 average of 65 percent. Declines in freezer occupancy were reported for all regions except the South Atlantic, where occupancy advanced due primarily to increased holdings of frozen citrus concentrates.

### Dairy and dairy products

A 20-million pound net gain brought March 1 stocks of butter to 259 million pounds. This was more than 3 times the 80 million pounds on hand March 1, 1961, and more than 4 times the 5-year March 1 average of 61 million pounds. Government-owned butter reported on March 1 totaled 224 million pounds leaving 35 million pounds in commercial channels which compares with 24 million pounds last year and the average of 25 million pounds. American cheese holdings totaled 386 million pounds on March 1, a decline of 20 million pounds from a month earlier. This inventory is 31 percent above a year ago and 35 percent above average. March 1 stocks of cream totaled 7 million pounds.

### Fruits, vegetables and juices

The February build-up of frozen orange concentrates was 12 million gallons, about 1 million short of last year's gain but 5 million more than average. March 1 stocks of 42 million gallons were a record for the date and compare with 36 million gallons stored on March 1, 1961, and average holdings of 33 million gallons for the date. Stocks of frozen fruits totaled 439 million pounds on March 1, down 49 million from a month earlier. This reduction was larger than both a year earlier and average, but stocks were still at a record level for the date. Holdings of frozen apples at 63 million pounds and cherries at 84 million pounds were the largest ever for March 1. Strawberry stocks were reduced 20 million pounds during February to 113 million on March 1. For the date, these holdings were 9 percent under a year earlier and 15 percent under average. Slightly more than 1 billion pounds of frozen vegetables were in storage on March 1 compared with 861 million on this date last year. Average holdings for March 1 are 728 million pounds. During February, frozen vegetable stocks were reduced by 88 million pounds, almost twice the reduction of a year ago and about one-fourth more than average.

### Poultry and poultry products

Warehouse holdings of total poultry meats declined 60 million pounds during February. This net reduction was 23 million more than occurred a year earlier and 21 million more than the February average reduction. Total poultry stocks, at 345 million pounds on March 1, were 29 percent above March 1, 1961, and 26 percent above average. Although turkey holdings during February declined 32 million pounds, March 1 turkey stocks, at 219 million pounds, were a record for the date. This new record exceeded by 64 million pounds, the previous March 1 high established in 1958. The March 1 inventory was 43 percent above a year ago and 52 percent above average. Shell egg stocks in refrigerated warehouses totaled 38,000 cases, the lowest March 1 holdings since 1936. The net reduction of 9 million pounds in frozen egg stocks during February left 41 million pounds in storage on March 1. These stocks were 17 percent below holdings on March 1, 1961 and 32 percent below average.

### Meat and meat products

The net in-movement of red meat stocks during February totaled 16 million pounds, 8 million less than a year earlier and 12 million less than average. Warehouse holdings of red meats on March 1 were 498 million pounds, the third smallest quantity recorded in storage for the date. Beef stocks, at 168 million pounds on March 1, were reduced 16 million pounds during February. However, they were 17 percent above March 1, 1961, and 2 percent above average. A 29-million pound net increase in total pork stocks brought March 1 holdings to 238 million pounds. This compares with a 34 million pound gain during February 1961 and the 5-year average gain of 38 million. Frozen pork rose 28 million pounds to total 200 million pounds on March 1 and cooler pork increased 1 million to 38 million pounds. Other meats, at 92 million pounds on March 1, were up 3 million pounds from February 1.

Pork . . . . .	lb.	5,014	2,130	2,298	1,854
Beef . . . . .	lb.	6,920	2,519	2,452	1,828

1/ Government holdings are included in the tables of total holdings elsewhere in the report and consist of reported stocks held by USDA, the Armed Services, and other Government agencies. In addition to stocks reported above, Armed Services hold some stocks in space owned by them on which figures are not available.

2/ Based on actual reports. Estimates on late reports are not included. Current figures will be revised next month.
